# Healthy Youth Survey 2010 Survey Results

King County (County No. 17), Grade 8

Number of students surveyed: 3529
Number of valid responses: 3411
Estimate of enrolled students:\* 5093
Survey participation rate:\*\* 67%

#### Introduction and Overview

The impact of adolescent health risk behaviors remains a primary concern of citizens throughout the country. Many health problems experienced by adolescents are caused by a very few preventable behaviors. Patterns of alcohol, tobacco, and other drug (ATOD) use and related risk behaviors are often formed during adolescence. These patterns play an important role in health throughout adulthood.

This report presents results from the fall 2010 Healthy Youth Survey in Washington State. This survey was sponsored by the Department of Health (DOH), the Office of Superintendent of Public Instruction, the Department of Social and Health Services, the Department of Commerce, the Family Policy Council and the Liquor Control Board in cooperation with schools throughout the state of Washington.

For each item, local results appear in the first two columns and statewide results appear in the second two columns. The number of valid responses ("n") appears in parentheses for each item. Survey items covering the same topics are grouped together (the item numbering is specific to this report and does not necessarily reflect the item order on the actual survey). The bulleted points and graphs included at the beginning of this report highlight selected findings. Additional information may be found in the *Interpretive Guide* posted to the Healthy Youth Survey web site (http://www.hys.wa.gov/).

Survey participation rates can be found on the Healthy Youth Survey web site. The following guidance from DOH may be used when reviewing your results. However, if a particular group(s) of students did not complete the survey and therefore did not contribute to your results, there may be limitations to your results even if you have a high participation rate (i.e., if differences exist between students who *did* and who *did not* complete the survey). There may be value in discussing the potential limitations when using the results in this report.

- 70% or greater participation–Results are probably representative of students in this grade.
- 40–69% participation–Results may be representative of students in this grade.
- Less than 40% participation—Results are likely not representative of students in this grade but do reflect students who completed the survey.

#### **Key to the Notes**

The survey was administered in 4 versions: Forms A and B (or alternate Form NS, identical to Form B but without the sexual behavior questions) were administered to students in Grades 8, 10, and 12. Forms A and B (or NS) contained a core set of common items (see "List of Core Items" on the last page of this report) and additional items unique to each form. Form C was administered to students in Grade 6. This form consisted primarily of items drawn from Forms A and B but also included some unique items. Several items on each form were optional at the discretion of the school; schools that did not administer the optional items tore off the last page of the survey booklet. The following notes are used throughout this report to document the differences between the items on different versions and indicate the optional items:

A =wording on Form A

B = wording on Form B (and NS)

C = wording on Form C

† = optional item

<sup>\*</sup> Estimate of enrolled students based on figures from the 2008–2009 school year, provided by OSPI (or later if school not in 2008 enrollment file).

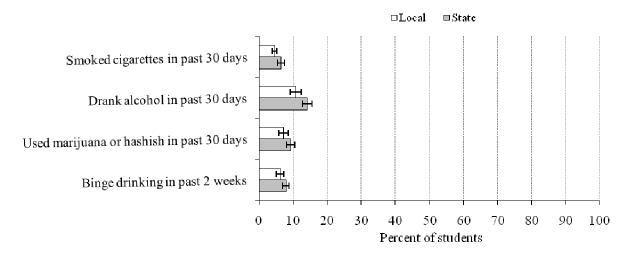

<sup>\*\*</sup> Participation rate = valid responses ÷ enrolled students (may be >100% if enrollment greater in 2010 than 2008).

#### **Highlights of the Local Results**

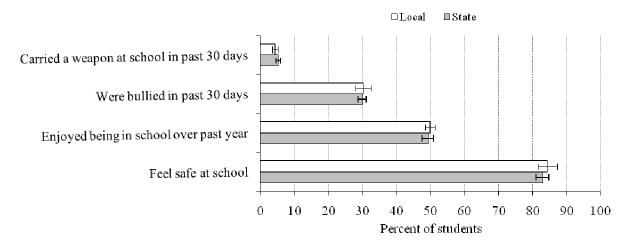

Your students and students statewide reported the following behaviors and attitudes:

		Your stu	ıdents	States	wide
•	Smoking cigarettes in the past 30 days (see item 24).	4.4%	$(\pm 0.7\%)$	6.4%	$(\pm 1.0\%)$
•	Drinking alcohol in the past 30 days (see item 28).	10.8	$(\pm 1.6)$	14.0	$(\pm 1.4)$
•	Using marijuana or hashish in the past 30 days (see item 29).	7.1	$(\pm 1.4)$	9.2	$(\pm 1.2)$
•	Drinking five or more drinks in a row in the past 2 weeks (see item 55).	6.1	(± 1.1)	7.8	$(\pm 0.9)$
•	Carrying a weapon at school in the past 30 days (see item 102).	4.3	$(\pm 0.8)$	5.2	$(\pm 0.6)$
•	Being bullied in the past 30 days (see item 122).	30.2	$(\pm 2.2)$	29.9	$(\pm 1.2)$
•	Enjoyed being in school over the past year (see item 191).	49.9	$(\pm 1.5)$	49.2	$(\pm 1.7)$
•	Feeling safe at school (see item 202).	84.4	$(\pm 2.9)$	83.0	$(\pm 1.9)$

#### Substance Use

#### **Bullying and School Climate**

#### Selected Results by Gender

Selected items are presented by gender to highlight any differences between females and males. The p-values reported after each item can be used to examine whether differences in the local data between females and males are statistically significant. A p-value of less than .05 means, for the local results, there is a significant difference between females and males (i.e., the probability that the difference occurred by chance is less than 5%). To ensure student anonymity, local results are suppressed for each item on this page if any cell (e.g., females who reported smoking) represented fewer than 10 students.

During the past 30 days, on how many days did you smoke cigarettes? (See item 24.)

None

1 or more

During the past 30 days, on how many days did you drink a glass, can or bottle of alcohol (beer, wine, wine coolers, hard liquor)? (See item 28.)

None

1 or more

Think back over the last 2 weeks. How many times have you had five or more drinks in a row? (A drink is a glass of wine, a bottle of beer, a shot glass of liquor, or a mixed drink.) (See item 55.)

None

Once or more

During the past 12 months, did you ever feel so sad or hopeless almost every day for two weeks or more in a row that you stopped doing some usual activities? (See item 110.)

No Yes

In the last 30 days, how often have you been bullied? (See item 122.)

I have not been bullied Once or more

I feel safe at my school. (See item 202.)

No Yes

# Alcohol, Tobacco, and Other Drug Use

Alcohol, tobacco, and other drug use has been a major concern in this country for many years. The consequences of ATOD use are well known. In the short term, ATOD use interferes with positive physical, emotional, and social development. In the long term, ATOD use is associated with delinquency and criminal activity, unintended injuries, and a variety of health complications including shorter life expectancy. The economic costs of ATOD use are enormous (in Washington State an estimated \$1.81 billion in 1990 \$2.54 billion in 1996, and \$5.21 billion in 2005). Tobacco use is the world's leading cause of preventable death, disease, and disability. This section provides information about lifetime ATOD use (which in part reflects experimental use), use in the past 30 days (i.e., current use), and other tobacco-, alcohol-, and drug-related issues.

#### Lifetime Use

#### **Other Health Concerns**

This section provides results regarding other health concerns including nutrition and fitness, health conditions and health care, safety, behaviors related to intentional injury, depression, and gambling behavior. Proper nutrition and exercise are critical components of a healthy life, as is access to preventive health care. Safety-related behaviors, such as wearing a seat belt when in a moving vehicle, can profoundly influence the outcome of an accident. Injury is the leading cause of death for adolescents aged 10 to 19, and violence contributes to injury-related deaths. People who are depressed experience a range of symptoms, and depression is associated with suicidal behavior.

#### **Nutrition and Fitness**

63. Obese: "Obese" includes students who are in the top 5% for body mass index by age and gender based on growth charts developed by the Centers for Disease Control and Prevention (2000). "Overweight" includes students who are in the top 15% but not the top 5%. (Computed from numeric responses to "How tall are you without your shoes on?" and "How much do you weigh without your shoes on?")

Obese
Overweight
Not overweight

Note. Results are suppressed for building-level reports.

64.	Which of the following are you trying to do about your
	weight?

- a. I am not trying to do anything about my weight
- b. Lose weight
- c. Gain weight
- d. Stay the same weight

#### 65. How often do you eat dinner with your family?

- a. Never
- b. Rarely
- c. Sometimes
- d. Most of the time
- e. Always
- 66. How often in the past 12 months did you or your family have to cut meal size or skip meals because there wasn't enough money for food?<sup>†</sup>
  - a. Almost every month
  - b. Some months but not every month
  - c. Only 1-2 months
  - d. Did not have to skip or cut the size of meals

#### 67. Did you eat breakfast today?

- a. Yes
- b. No

#### **School Climate**

In the past few years Washington State has given increased attention to supportive learning environments. Students need a safe, nurturing, healthy, and civil learning environment if they are to be successful in school. This section provides information about student perceptions of school climate.

122. A student is being bullied when another student, or group of students, say or do nasty or unpleasant things to him or her. It is also bullying when a student is teased repeatedly in a way he or she doesn't like. It is NOT bullying when two students of about the same strength argue or fight. In the last 30 days, how often have you been bullied?

30 days, how often have you been bullied?	(n = 3,	285)	(n = 9)	,435)
a. I have not been bullied	69.8%	$(\pm 2.2\%)$	70.1%	$(\pm 1.2\%)$
b. Once	13.6	$(\pm 1.2)$	12.8	$(\pm 0.8)$
c. 2–3 times	8.1	$(\pm 1.2)$	8.5	$(\pm 0.7)$
d. About once a week	3.1	$(\pm 0.5)$	3.2	$(\pm 0.4)$
e. Several times a week	5.4	$(\pm 0.5)$	5.4	$(\pm 0.5)$

# **Quality of Life**

Health-related quality of life is an individual's or group's perceived physical and mental health over time. At the individual level it involves a person's health and health-related conditions; at the community level it involves conditions that influence people's health. This section contains the results of the items related to individual quality of life.

		12)		State	
136.	Youth Quality of Life (Computed from items 137–142.)			= 4,234)

#### **Risk and Protective Factors**

Decades of research have shown that certain risk factors are associated with increased likelihood of health risk behaviors including ATOD use, violence, and delinquent behaviors. Similarly, research has shown that protective factors exert a positive influence against the negative influence of risk factors. The survey included substantial coverage of risk and protective factors based on the work of Drs. Hawkins and Catalano and associates at the University of Washington. The premise of the risk reduction and protective factor enhancement approach to prevention is that preventing a problem before it occurs requires addressing the factors that predict the problem. Ideally, this strategy entails discovering the causes of the problem behavior and influencing those causes. Many of the survey items were used to assess students' status on risk and protective factors in the community, school, and peer-individual domains. Composite scales were computed for use in local program planning.

The table on the following page provides the complete list of risk and protective factors and indicates the years the Healthy Youth Survey has included each factor.

# Risk and Protective Factor Framework and Reporting Schedule

#### **Risk and Protective Factor Scale Results**

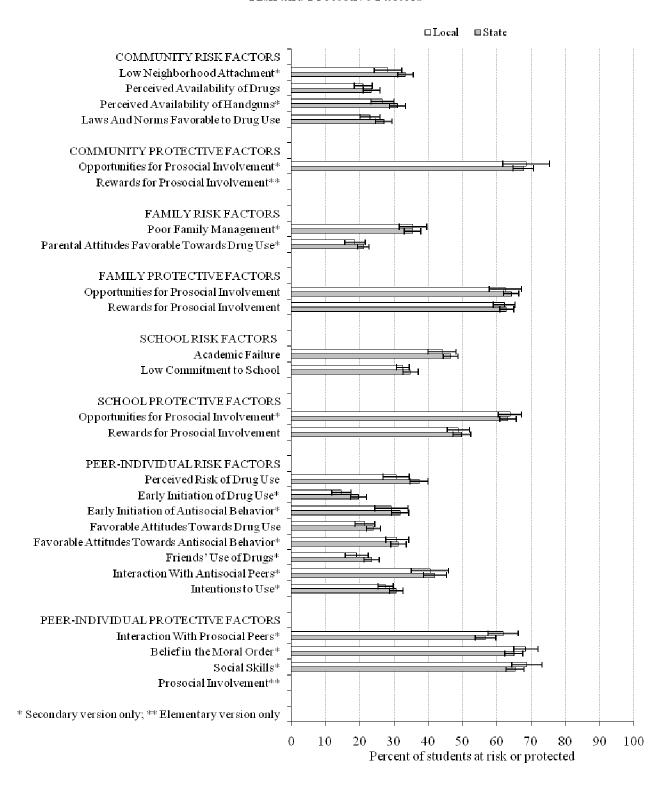

For each *risk* factor scale, the percentage of students who are at risk (i.e., who agreed with statements that predict ATOD use or other problem behaviors) is reported; higher percentages indicate that *more* students are likely to engage in problem behaviors. For each *protective* factor scale, the percentage of students who are resilient (i.e., who agreed with statements that predict the ability to resist ATOD use or other problem behaviors) is reported; higher percentages indicate that *fewer* students are likely to engage in problem behaviors. These percentages are based on computational methods provided by the University of Washington's Social Development Research Group.

Community Risk Factors	Local	State		
Low Neighborhood Attachment (Items 147–149)	(n = 1,708) 28.2% (± 4.0%)	(n = 5,025) 33.4% (± 2.3%)		
Low Neighborhood Attachment (Items 147–147)	(n = 1,680)	(n = 4.949)		
Perceived Availability of Drugs (Items 150–153)	21.0%   (± 2.6%) $(n = 1,675)$	$23.4\%  (\pm 2.5\%)$ $(n = 4,943)$		
Perceived Availability of Handguns (Item 154)	$26.6\%   (\pm 3.4\%) $ (n = 1,693)	$31.0\% (\pm 2.3\%)$ (n = 4,970)		
Laws And Norms Favorable to Drug Use (Items 155–160)	22.9% (± 2.9%)	27.0% (± 2.5%)		
<b>Community Protective Factors</b>	Local	State		
Opportunities for Prosocial Involvement (Items 161–164)	(n = 1,652) $68.6%$ (± 6.8%)	(n = 4,876) 67.8% (± 3.0%)
